HEALTHY FUTURES' VISION

For all New Zealand children to live in an environment that enables and supports healthy eating and physical activity.

CHANGE: Rethinking and replacing sweetened beverages with water

Successful change

- Understand the need for change
- Support the change
- Participate

Raising awareness and a desire for change

Awareness that sugary drinks drive dental disease, obesity and type 2 diabetes.

CHANGE: Rethinking and replacing sweetened beverages with water

"Mum you'll never guess what they've got here; they've got water!
You can never usually get water at school galas"

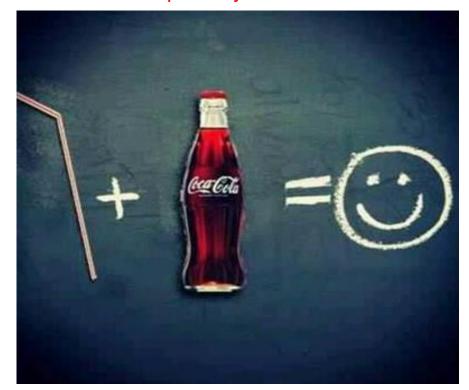

How do we counteract the pressures toward harmful products in children's environments?

Relatively cheap, readily available, and ubiquitously marketed.

The 'how' to implement change: Healthy Futures' Water Kit

- 3 x 10 L water dispensers
- Chilly bin
- HPA 100% Water resources
- Top up jug
- Running guide and recipe ideas

CHANGE: Rethinking and replacing sweetened beverages with water

Successful change

- Understand the need for change
- Support the change
- Participate
- How to change and implement a new pro water culture
- Implement the change

Problem and Solution= Awareness and Action

A tool to enable community led change

Tackling the obesogenic environment in children's sport

A sporting chance

Putting the positive spin on change

Bruises in the game of change!

A supportive school environment leads and strengthens community action

- Brooklyn School purchased their own water kit
- Kit loaned out to wider community for sport prize givings and neighbouring school galas
- Awarded the NZ Dental Association 'Switch to Water' challenge.

CHANGE: Ability and Reinforcement phase

Awareness Desire Knowledge Ability Reinforcement

Successful change

- Understand the need for change
- Support the change
- Participate
- How to change and implement a pro water culture
- Implement the change
- Demonstrate performance
- Sustain the change
