## PACIFIC SOAKING IN FAST FOOD

#### AN ANALYSIS OF FOOD OUTLETS IN SOUTH AUCKLAND

Nick Garrett

**Steve Taylor** 

Elaine Rush

# Rationale Environmental

### What's there to eat?

Local food retail

→ food at home

→ nutrition & energy

#### Tokelau migration Harding et al 1974, 1975, 1986

Nutrition Transition

Pacific → NZ food

### CNS 2002\03

Fruit 50% met RDI 90% Ate White Bread & Butter

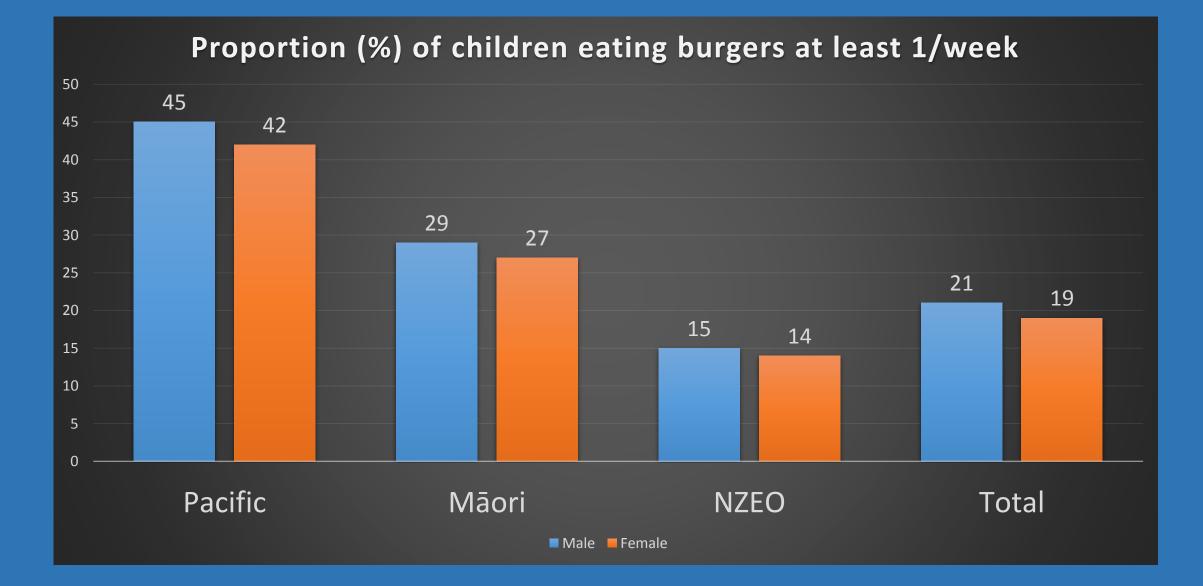

Veges 62% met RDI

50%+ Ate Taro 1/week

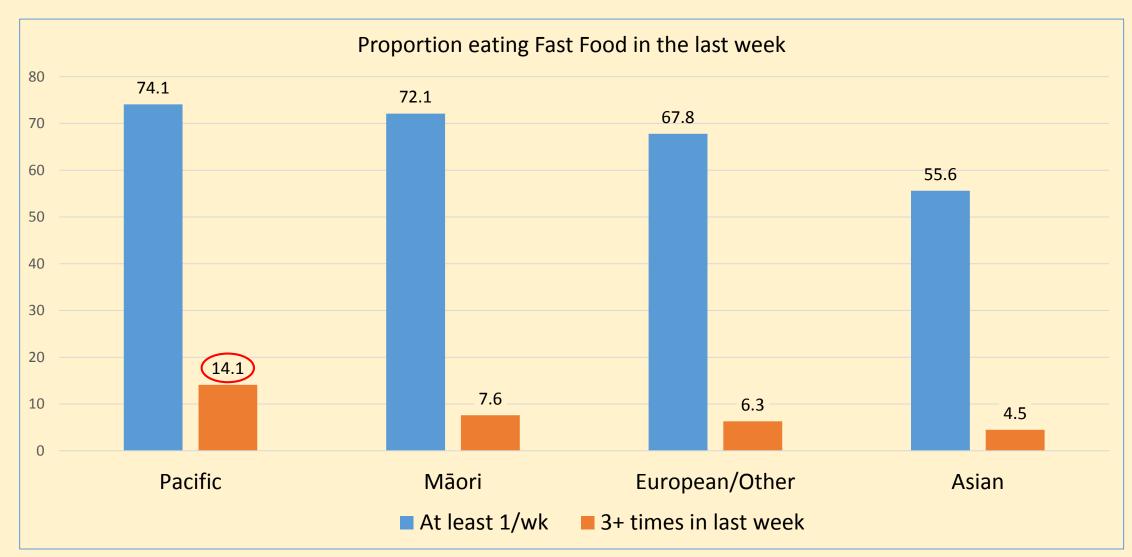

CNS 2002/03

#### NZ Health Survey 2013

#### Children 2-14 years

NZ Literature Fast Food outlets

#### <u>Pearce et al 2007</u>: Better access in poorer areas

#### <u>Rosenheck 2008</u> : Fast-food → high caloric intake in children

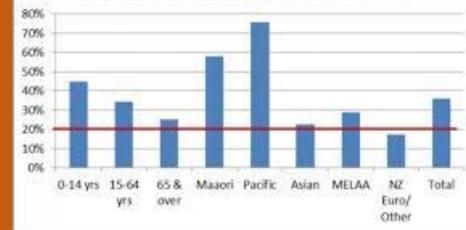

Day et al 2013 : outlets around schools Christchurch

- Quantify and map density of fast food and fresh food retail in South Auckland
- Fast food Multinational and Locally owned Takeaway premises e.g. Fish & Chips
- Fresh food Fruit & Veg, Butcher and Fish shops, Supermarkets

#### Manukau

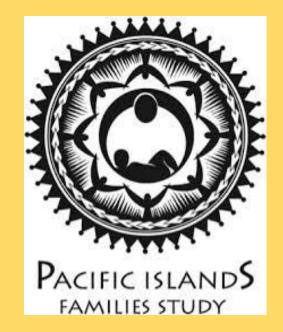

## NZ-born Pasifika

PIF Study

>1000 Pacific children and their families

**Recruited in 2000** 

Followed up age 1, 2, 4, 6, 9, 11 & 14yrs

- Food License Registrations 2013 : n = 7002
- Exclusions : n = 6382

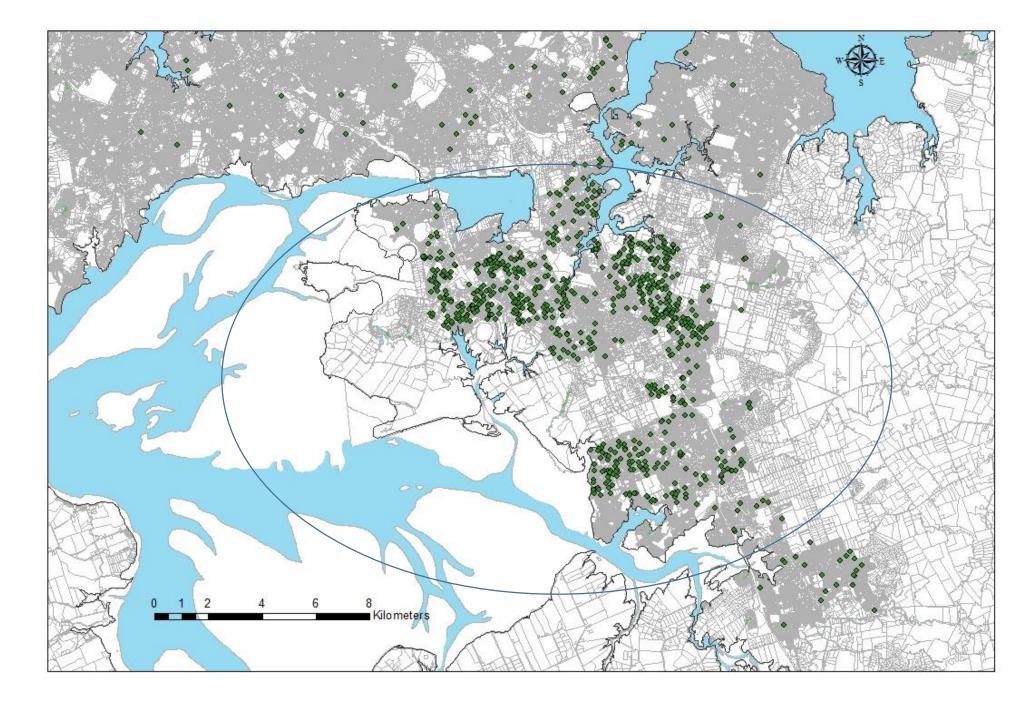

Catering, Function Venues, Online retail, Storage & Packaging, Missing info

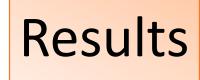

- South Auckland n = 4373
- Zenbu : cross check Council data

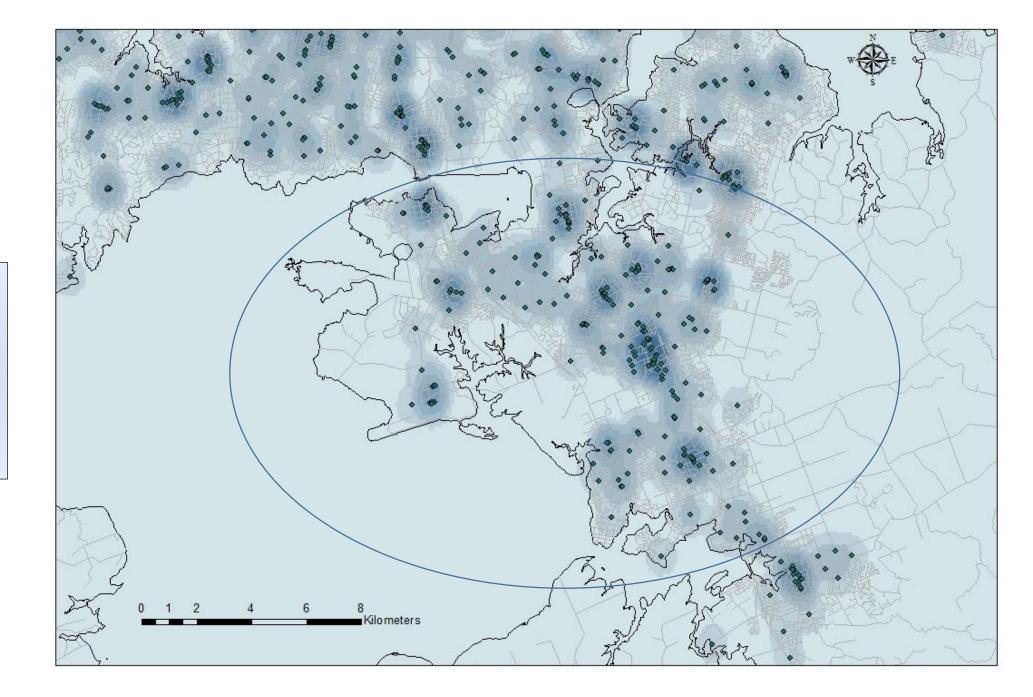

## Results

#### PIF Residents

#### Fast Food Outlets & Density

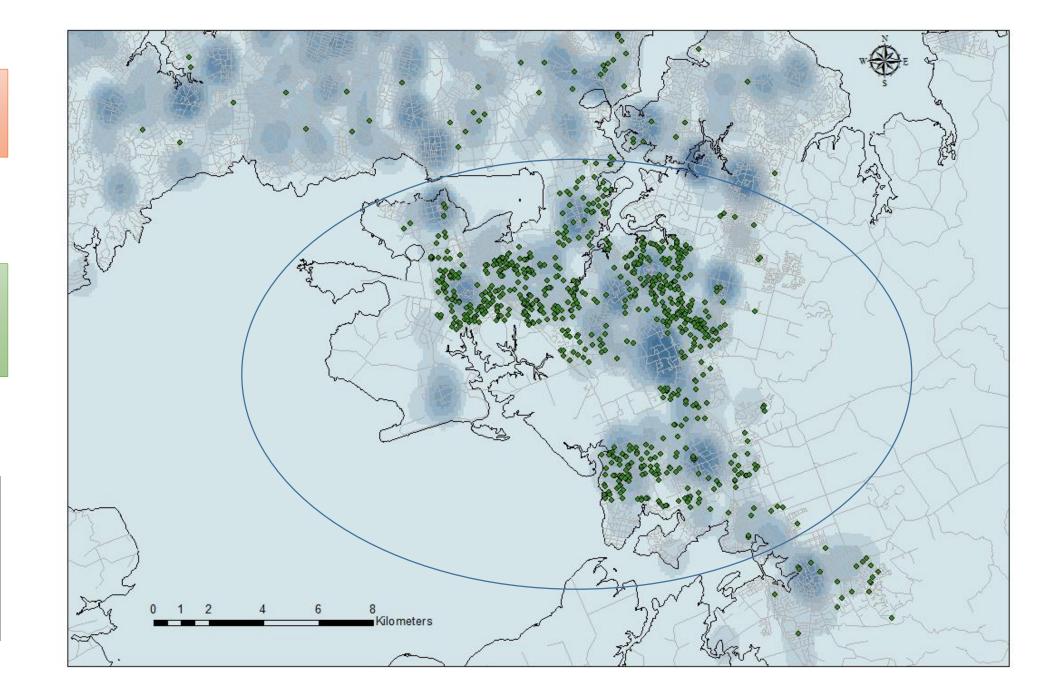

## Results

PIF

Residents

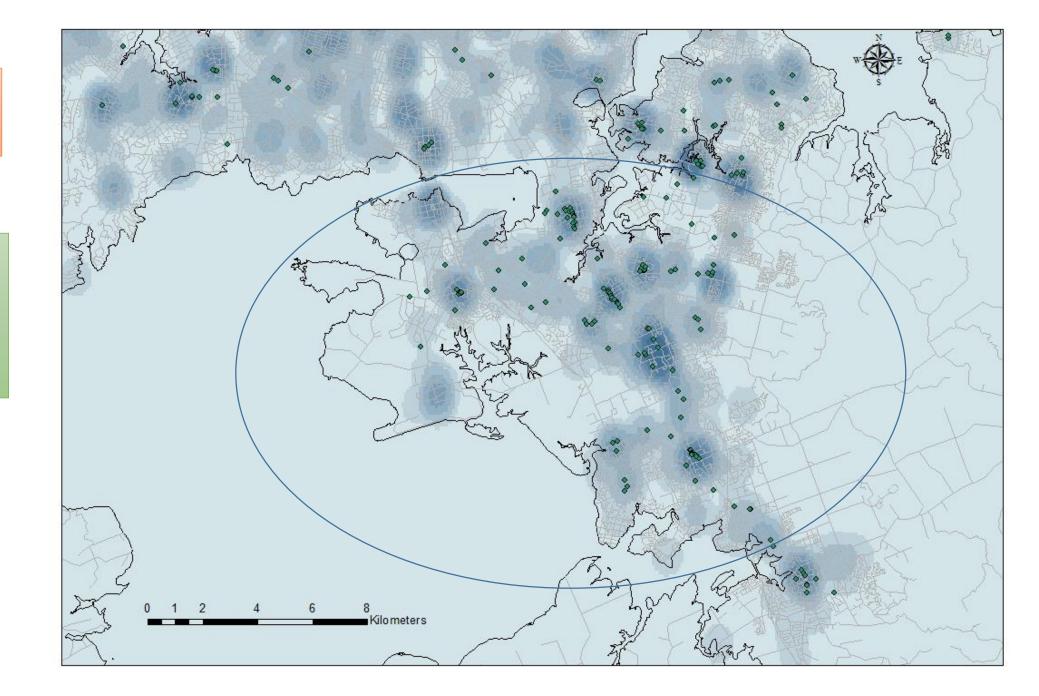

## Results

Fresh Food Outlets

Fast Food density

## strengths

- Quantification of range of food outlets in Auckland
- Illustration of food environment conditions in South Auckland
- Contribution to knowledge of environmental risk factors for consumption of fast foods
- Potential contribution to explain high prevalence of rapid weight gain among Pacific peoples

## challenges

- Ecological e.g. difficult to correlate with consumption
- Lack of food product detail within outlets e.g. often mixed
- Food outlets highly dynamic but always increasing
- Time-demanding data gathering

### Conclusion

- Pacific families are Soaking in Fast Food
- It's hard to ignore the high visibility of Fast Food outlets in South Auckland
- Fresh food stores don't compare at a ratio of 1 to 10 Fast Food outlets

## Closing remarks & Recommendations

- National/Local Govt can/should actively lead public health food safety
- Civic duty to protect the community's over-exposure to unsafe food
- Work with/regulate fast food industry to reduce density of outlets
- Implement policy to reduce Fast Food and increase Fresh Food consumption
